

Learning through play - The Pre-K 3 way!

If you have a child who will be three years old by December 1, 2021, there's still time to register him or her for our fantastic Pre-K 3 program at St. Christopher Catholic School. This full day, active program is focused on engaging children through play and interactive experiences in order to help them thrive socially, academically, physically, and spiritually. While sharing toys with classmates, children develop life skills such as sharing, taking turns, and using language to express their feelings. When participating in small groups and center time, children express themselves artistically (painting is always a favorite), and build up fine motor strength (by playing games and using manipulatives and small toys such as Magnatiles). They learn beginning reading and mathematical skills in fun and interactive ways (such as placing a specific number of raindrops under a cloud or putting together their customized name puzzles), and participate in science experiments (the "Elephant Toothpaste Science Experiment - Halloween Edition" was a HUGE hit this year!)
