

Classroom News for Week of March 11, 2019

Math 7:

We will continue to work on chapter 5 this week with Pythagorean Theorem, Distance on coordinate plane (and distance formula), Polygons and their interior and exterior angles.

Math 8:

We started chapter 8 with addition and subtraction of polynomials. We will continue working with operations with polynomials all this week.

Math 9:

We will be working for most of this week with simplifying radical expressions and operations with radical expressions. We will also be working with radical equations and methods for solving them.
