

Classroom News for Week of March 18, 2019

Math 7:

The chapter 5 test will be on Tuesday March 26. Study guides for this test will be given out on Monday of this week. We will spend this week finishing up chapter 5 with distance formula and using the Pythagorean theorem to find the distance between 2 points. We will also review percent's this week. Topics will include the percent proportion, percent of increase/decrease, simple interest and discounts and sales tax.

Math 8:

We will continue working with factoring polynomials. So far we have covered factoring using the distributive property and by grouping. This week we will focus on factoring trinomials and factoring completely. We will finish the chapter by the end of this week. Study guides for the chapter 8 test will be given out on Friday and the chapter 8 test will be on Friday March 29th.

Math 9:

We will finish chapter 10 this week with Radical Equations. Study guides for the chapter 10 test will be given out on Tuesday and the chapter 10 test will be on Tuesday March 26.

Students will need to purchase a regents exam review book this week. I have the books here. They are \$3.00 each. We will begin using the books within the next few weeks and continue to use them up until the regents exam (which will be on June 19th).
