

## **Ms. Ensminger's News for "Fish Fry-day"**

Week of 3/11

I hope you can enjoy the Saint Chris fish fry available at school tonight! It smells delicious from my classroom. Reminder: no school for students next Friday due to staff development.

6<sup>th</sup> Grade Science: Next week we will finish our lab work on the hardness of rocks and minerals. Tuesday, we will learn how to calculate the density of objects. Wednesday and Thursday, we will learn how to perform the streak test with rocks and minerals.

5<sup>th</sup> Grade Science: We will have our next science test on Wednesday. Monday, we will review for the test. On Tuesday, we will explore how to convert temperatures from Celsius to Fahrenheit (not on the test). Thursday, we will begin our next STREAM challenge.

5<sup>th</sup> Grade Religion: Next week we will begin working on our special prayer service for the Stations of the Cross. We need to learn these stations and what happens at each. We will have the service next month if you would like to join us, details to follow soon.

Have a wonderful weekend,  
Ms. JoAnn Ensminger
